<u>Regarding the JBP EMC report</u>:

    a. Please indicate if any of the USB cables tested with the EUT are shielded.

    b. Please specify the I/O protocol (e.g., parallel, USB, etc.) by which the other peripherals in the test set-up (printer and mouse) are connected to the pc. Please note that C63.4 requires that at least two different I/O protocols be used, so, since the EUT uses USB, the printer or mouse should use a different I/O protocol.

<u>Response:</u> a, yes, the USB cables tested with the EUT are shielded.

    B, yes, please see my answer as below.

external device interface type of the test equipment in lab of as below:

Printer--USB☐

mouse--PS/2☐

keyboard--USB☐
